DETAILED ACTION

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to a process of preparing, classified in class 546, subclass 158.
- II. Claims 12-22, drawn to a process of a preparing, classified in class 546, subclass 153.
- III. Claims 23-26, drawn to a process of preparing, classified in class 546 subclass 157.
- IV. Claim 27, drawn to a process of preparing, classified in class 546, subclass 152.
- V. Claims 28-30, drawn to compounds, classified in class 546, subclass 156.

The inventions are distinct, each from the other because of the following reasons:

These distinct inventions have acquired separate status in the art, will support separate patents, and will require different fields of search for the respective inventions: Accordingly, restriction for examination purposes as indicated is considered proper; 35 U.S.C. 121; 37 CFR 1.141; 37 CFR 1.142.

Inventions I-IV are drawn to patentably distinct processes. Groups I-IV are restricted out in separate Groups, as they are really multiple processes of preparing. MPEP 806.05(f) provides for restricting out such process claim where it can be established that more than one process of preparing the compounds can be employed to do so. Claims 1-27 are evidence claims that more than one different process may produce the compound cilostazol.

Art Unit: 1625

Inventions I-IV and V are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made materially different processes as evidenced by applicants' own claims and specification.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

In, In re Weber, 198 USPQ 332, In re Hengehold, 169 USPQ 473, was noted for the proposition that as long as applicants have maintained the right (as they do here) to file the non-elected subject matter in divisional applications, then restriction is proper, as to that point.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

This restriction requirement is being written as previous experience has indicated that with Foreign applicants and the inherent time delays, applicants' representative is better able to make an informed, correct, election of the invention applicants would wish to have prosecuted here if applicants are given the opportunity to see the restriction requirement laid out, and given the time to make an informed decision.
